PROPOSED LICENSE REQUEST

Request: Requesting authorization for the Forest Preserves of Cook County (the "Forest Preserves"), as Licensor to grant a License to ComEd, Grantee, to locate, operate and maintain approximately 482 feet of existing electric line overhead on newly installed power poles on the north side of Dundee Road in Palatine, to accommodate an Illinois Department of Transportation ("IDOT") road improvement project. The road improvement project includes reconstruction of the road over a culvert and a new 8-foot-wide shared use path and retaining wall on the south side of Dundee Road within the existing road right of way (ROW). The proposed location of the overhead electric line would require removal of eight (8) trees, resulting in tree mitigation fees. In practice, more trees may need to be removed than originally estimated. Any increase in the tree mitigation fee will be in accordance with the Tree Mitigation Plan (see Board Item No. 20-0279), and if such increase is more than 20% of the original estimate, then approval will be sought from the Forest Preserves of Cook County Board of Commissioners.

EASEMENT REQUEST

Request: Requesting authorization for the Forest Preserves of Cook County (the “Forest Preserves”) to grant a permanent and a temporary easement to the Illinois Department of Transportation (“IDOT”) at Des Plaines River Road north of Foster Avenue in Schiller Park for 0.501 acres or 21,823 square feet.

Reason: IDOT is seeking to address safety and the potential collapse of the road into the Des Plaines River and improve pedestrian safety. The permanent easement is for construction and maintenance of a retaining wall, rip rap, a new sidewalk and other related improvements described in the plans and specifications. The temporary easement will be used for construction access. The work would require removal of sixteen (16) living trees and one (1) dead tree, resulting in tree mitigation fees. In practice, more trees may need to be removed than originally estimated. Any increase in the tree mitigation fee will be in accordance with the Tree Mitigation Plan (see Board Item No. 20-0279), and if such increase is more than 20% of the original estimate, then approval will be sought from the Forest Preserves of Cook County Board of Commissioners. Staff is recommending waiver of easement compensation in light of safety and environmental benefits of riverbank stabilization. IDOT has agreed to pay tree mitigation fees. The term of the temporary easement is five (5) years, or completion of construction, whichever comes first.

The area for the permanent easement is 0.298 acres, and the area for the temporary easement is 0.203 acres. IDOT indicates that seventeen (17) trees are expected to be removed for this project.

Easement Fee: \$3,650.00 waived

Tree Mitigation Fee: \$148,295.73

Request: Authorization for the Forest Preserves of Cook County (the “Forest Preserves”) to enter into and execute

Good(s) or Service(s): Agricultural row crop farming at 290 E. Glenwood-Dyer Road, Glenwood, IL 60425 and 21695 Torrence Avenue, Sauk Village, IL 60411

Contract Value: N/A

Contract Period: 3/10/2026 - 12/31/2026, with one (1) one-year extension option to be exercised at the discretion of the General Superintendent or their designee

Estimated Fiscal Impact: Revenue generation of up to \$20,381.40 over two (2) years

Accounts: Corporate Land Use Fees 51001.411366 (revenue generating)

Contract Number(s): #74000017750 issued under Project #25RM 121

Concurrences: The Chief Financial Officer has approved this item. Final contract is subject to legal review and approval.

District(s): 5, 6

Summary: The Forest Preserves has solicited a contract for row crop production at 290 E. Glenwood-Dyer Road in Glenwood and 21695 Torrence Avenue in Sauk Village. These sites were historically used for agriculture prior to acquisition by the Forest Preserves, and as such, do not exist in an ecologically natural state. Farmers will have use of the properties for seeding one or more row crops including wheat, oats, soybeans, and/or other crops subject to the review and written approval of the Forest Preserves’ Director of the Department of Resource Management. This practice allows the Forest Preserves to generate revenue, while at the same time preventing invasive plant species from overtaking fallow land. It is the Forest Preserves’ intention to restore fallow land as capacity and funding allows. These interim farming practices are a proven method to keep lands in a more manageable condition until restoration can take place, thereby reducing future restoration costs. The contract term for the row crop farming is through the end of calendar year 2026, with one (1) one-year mutual renewal option to be exercised by the General Superintendent or their designee, which allows the Forest Preserves the option to discontinue farming practices at our discretion in order to restore these lands to a natural condition.

A single bid was received for both sites in response to Solicitation #26-31-013716. Smits Farms, Inc. was found to be responsive to the terms of the solicitation, and their proposal will result in a total potential revenue generation over the next approximately two (2) years of \$20,381.40, or \$10,190.70 per year.

ComEd requires the Forest Preserves to enter into an Electric Facilities Service Acknowledgment agreement, along with ancillary agreements (collectively, the “Agreements”).

Under the Agreements, the installed equipment will be owned by ComEd and the Forest Preserves would be responsible for a monthly rental and other ancillary fees. Payment of such fees would be pursuant to electricity service contracts with ComEd. The Forest Preserves is authorized to pay energy service bills via Board Item No. 25-0296. The continuous term of the Agreements requires board approval; however, the Agreements are terminable by the Forest Preserves if electrical service is discontinued.

The Agreements are form agreements that include rates and non-standard provisions and riders, that can be unilaterally changed by ComEd subject to regulatory approval. The terms of the Agreements are generally non-negotiable. Due to time sensitivities, the Forest Preserves respectfully requests authorization to have the General Superintendent execute the Agreements.

Summary: The original scope of services was for design, construction administration and commissioning of a new Very High Efficiency (VHE), all-electric heating and cooling (HVAC) system at the Forest Preserves' General Headquarters. Additional time is needed for the continuation of commissioning services following unforeseen damage to outside ground-mounted HVAC pipes from falling rooftop ice and by a delay in completion of the windows due to a delay in approval and procurement of the specified materials. Summary: The Forest Preserves entered into an agreement with Juiced by Shic, LLC (“Juiced by Shic”) on May 8, 2023, following a competitive Request for Proposals (RFP) process to provide food, beverage, and retail concession services at the Swallow Cliff facility near Palos Park. Juiced by Shic was selected as the more responsive and responsible proposer among two (2) submissions.

The initial agreement term runs from May 8, 2023, through May 8, 2026. Based on Juiced by Shic’s successful performance that was demonstrated through consistent revenue generation and positive customer feedback on its healthy food, beverage, and retail offerings, the Forest Preserves recommends exercising the agreement’s two (2) year optional extension. This extension will allow Juiced by Shic to continue operating the seasonal concession at Swallow Cliff, ensuring continuity of service and maintaining a valued amenity for visitors.

As part of the proposed extension, the payment schedule for the Base Fee has been revised to provide greater flexibility. The previous requirement, which stipulated 50% of the Base Fee be paid by January 1 and the remaining 50% by July 1, will be removed and replaced in its entirety. Under the new terms, the first 50% installment will be due no later than July 15, and the remaining 50% installment will be due no later than November 15. This adjustment to payment deadlines supports improved cash flow management while maintaining the existing agreed-upon revenue structure.
