Summary: The proposed 130th Street Chicago Transit Authority (“CTA”) Station will be the new terminal station for the Red Line Extension located just to the east of the CHA Altgeld Gardens housing community. As mitigation for the effects of the extension project on the Forest Preserves of Cook County’s (“Forest Preserves”) Beaubien Woods and to support the CHA and other community members in the area, the CTA agreed to provide funding to the Forest Preserves to connect the Altgeld Gardens community to the Beaubien Woods Boat Launch (See Board Item Nos. 23-0515 and 23-0520).

The CTA therefore transferred two (2) parcels of land to the Forest Preserves for this connection through an intergovernmental agreement. The acquisition now before the Board with the CHA includes an intergovernmental agreement between the parties (the “IGA”) to allow for the CHA to transfer approximately 2,224 square feet of additional CHA land near Greenwood Avenue to complete this trail connection (the “Property”). This new trail connection will encourage the community to use Beaubien Woods and its facilities. This project also includes a new public restroom at Beaubien Woods, which will require a connection for water service through the proposed trail corridor. The IGA and conveyance permits this water connection as well.

Through negotiations, the CHA has agreed to sell the Property to the Forest Preserves for the sum of

FIVE THOUSAND DOLLARS AND 00/100 (\$5,000.00) plus closing costs up to \$10,000.00 (up to \$15,000.00 in total). The purchase price is based upon two (2) M.A.I. appraisals obtained by the Forest Preserves and is subject to the Forest Preserves' satisfactory completion of its due diligence.

Permission is now sought, upon satisfactory completion of all due diligence and negotiation of any and all required documentation, as determined by the Forest Preserves Legal Department, to effectuate payment in the amount of the purchase price plus closing costs as full compensation for the acquisition of the Property.

This land acquisition advances the goals of the Forest Preserves' Southeast Cook County Land Acquisition Plan, Land Acquisition Plan, and Acquisition and Disposition of Land Position Paper.

Goods or Services: Cook County, through DES and in partnership with South Suburban College, owns and operates the Center for Hard to Recycle Materials (“CHaRM Center”) in South Holland, Illinois. DES is willing to allow the CHaRM Center to receive and dispose of electronics, textiles, polystyrene, and other difficult to recycle materials that the Forest Preserves collects from illegally dumped materials throughout the Forest Preserves, and this agreement will provide the logistics and terms of such arrangement.

District(s): 5

Summary: This proposed Intergovernmental Agreement with DES would allow the Forest Preserves to

periodically transport illegally dumped household hazardous waste materials collected throughout the Forest Preserves to the CHaRM Center in South Holland, Illinois for their proper storage and disposal. The Forest Preserves will maintain logs of all waste collected and delivered to the CHaRM Center for at least three (3) years from the date the waste was delivered. In exchange, the Forest Preserves will work with the architects currently designing the facility landscape to help furnish and install grass, plants and trees for its beautification and maintain those improvements for up to two (2) years from completion (subject to agreement extension). The proposed agreement is estimated to save the Forest Preserves approximately forty-two thousand dollars (\$42,000.00) on an annual basis. Final Intergovernmental Agreement is subject to legal review and approval.

PROPOSED INTERGOVERNMENTAL AGREEMENT

Department: Department of Resource Management

Other Part(ies): Cook County Department of Environment and Sustainability, Chicago, Illinois

Request: Authority for the Forest Preserves of Cook County (the “Forest Preserves”) to enter into an intergovernmental agreement with the Cook County Department of Environment and Sustainability (“CCDES”).

Goods or Services: Environmental assessment and remediation of polychlorinated biphenyls (“PCBs”) at Sauk Lake.

Agreement Number(s): N/A

Agreement Period: Five (5) years from date of execution, with one (1) five-year mutual extension option to be executed at the discretion of the General Superintendent

Fiscal Impact: N/A. The project will be implemented at no direct cost to the Forest Preserves, which may provide in-kind staff support for the planning, implementation, and monitoring of the projects.

Accounts: Grant and Mitigation 51010.521314 and 51010.521444

District(s): 5, 6

Summary: CCDES has been allocated \$4,000,000.00 as a result of a class action settlement against Monsanto Company and its subsidiaries to resolve allegations of Polychlorinated Biphenyl (“PCB”) contamination of waterways. This amount will be sub-awarded in whole to the Forest Preserves to support environmental assessment and potential remediation of PCBs at Sauk Lake in South Chicago Heights. PCBs are persistent organic pollutants that were widely used in industrial applications until banned in the late 1970s. Despite regulatory prohibitions, historical use and improper disposal have led to legacy contamination in many water bodies, potentially including Sauk Lake. This work was predicated by preliminary sampling conducted by the U.S. Army Corps of Engineers in 2015 indicating the presence of trace amounts of PCBs at the site. Further investigation is necessary to inform future efforts to address siltation within the lake, which presently inhibits ecological restoration and the ability to establish a sustainable fishery at the site.

Proposed project activities include sediment sampling to evaluate the source of any PCBs, along with the design, planning, and potential implementation of remediation measures if necessary to remove sediment. Removal of sediment may contribute to comprehensive watershed health and increased ecosystem services such as stormwater absorption, wildlife habitat, and resilience to climate change.

The Sauk Lake complex has been identified in the Natural and Cultural Resources Master Plan as the Forest Preserves’ 10th highest priority landscape for ecological restoration.

Summary: The Forest Preserves seeks to enter into an Intergovernmental Agreement with MCEVBD to contribute mapping and other data related to land management activities conducted on its properties (e.g. prescribed burning, invasive vegetation removal, deer management, etc.) from 2020 to present. This data will be utilized to evaluate the effectiveness of routine land management practices within the Forest Preserves as a strategy for reducing tick-borne disease risk within Cook County.

Sites will be surveyed to determine relative abundance of vector insect species, subject to the approval of the Forest Preserves, and correlated against historical land management activities to help answer questions about disease transmission and cooperative land management for the improvement of public health.

The Midwest Center of Excellence for Vector-Borne Disease was established in 2017 with the cooperation of the Centers for Disease Control & Prevention, along with research partners from Wisconsin, Minnesota, Michigan, Iowa, and Illinois to build region-wide solutions to the problem of vector-borne disease in the Midwest.

Summary: The Forest Preserves seeks authorization to enter into a sole source agreement with the Illinois Public Safety Agency Network (IPSAN) for public safety software. IPSAN is a nonprofit organization established under the Illinois Public Safety Agency Network Act, 50 ILCS 752/1 et seq., to promote intergovernmental cooperation among local public safety agencies. It is governed by various Illinois police chiefs and county sheriffs, including the Cook County Sheriff. IPSAN’s systems are used by the Cook County Sheriff’s Police Department and more than 100 law enforcement agencies in Cook County. The Forest Preserves’ Department of Law Enforcement has used IPSAN since 2007.

IPSAN’s software allows officers to securely access the Law Enforcement Agencies Data System (LEADS) and the National Crime Information Center (NCIC) from portable handheld devices. This enables officers to conduct computerized inquiries during traffic, pedestrian, and investigatory stops, whether on foot, bicycle, ATV, or in a squad car. Officers also use the software to prepare reports.

Summary: In 2024, the Forest Preserves Board of Commissioners authorized the Forest Preserves to engage SMG Security Holdings LLC (“SMG”) to monitor, inspect, and maintain security and fire alarm systems at various properties owned or leased by the Forest Preserves (Board Item No. 24-0271). SMG was selected after the Forest Preserves issued a Request for Proposals and received two (2) responses. The Forest Preserves determined that SMG was the most responsive and qualified respondent to manage the Forest Preserves’ existing security and fire alarm systems, while delivering an improved level of service. Services include support for over one hundred (100) existing security and fire alarm systems dispersed throughout forty-two (42) preserve locations.

Fire alarms are critical to the ongoing operations of our facilities, providing life safety protection at locations throughout the Forest Preserves. In recent weeks, several of our sites now need replacement notifier open-source type fire alarm panels and compatible devices. Existing systems are all twelve (12) to fifteen (15) plus years old. The age of the panels and devices are causing them to fail intermittently and compromised underground wiring is also causing intermittent connectivity issues.

The Forest Preserves is therefore requesting an additional two hundred and ninety thousand dollars

(\$290,000.00) (which includes a 17.5% contingency) to fund replacement of notifier fire alarm panels, compatible devices, and wiring where necessary at the Central Maintenance Compound buildings, Camp Sullivan cabins and bathhouses, Thorn Creek (Resource Management building), and Tinley Creek (Landscape Maintenance buildings). Replacement of the panels helps maintain high standards by improving safety, ensuring legal and regulatory compliance, and enhancing operational efficiency.
