**A Resolution Opposing the United States Army Corps of Engineers Proposed Use of the Fullerton Woods and Harry Semrow Golf Driving Range for Stormwater Management**

**WHEREAS**, in August of 2013, the United States Army Corps of Engineers ("U.S. Army Corps") issued an Integrated Feasibility Report and Environmental Assessment for the Upper Des Plaines River and Tributaries of Illinois and Wisconsin (the "Report");

**WHEREAS**, the Report sought to create a comprehensive plan for addressing flooding and stormwater along the Des Plaines River; and

**WHEREAS**, the Report proposed a variety of remediation measures along the Des Plaines river, including the creation of a reservoir within the Aptakisic Creek watershed, in Lake County, Illinois, near the Village of Buffalo Grove; and

**WHEREAS**, in October, 2013, the Village of Buffalo Grove passed a resolution opposing the siting of the reservoir at Aptakisic Creek; and

**WHEREAS**, the U.S. Army Corps issued a “Documentation of Changes to the Draft Integrated Feasibility Report and Environmental Assessment” (the “Documentation of Changes”) in response to the Village of Buffalo Grove’s resolution;

**WHEREAS**, the Documentation of Changes removed the proposal for a reservoir within the Aptakisic Creek watershed and proposed the creation of two reservoirs at Fullerton Woods and the Harry Semrow Driving Range within the Forest Preserve District of Cook County; and

**WHEREAS**, the Board of Commissioners of the Forest Preserve District of Cook County were never presented with and have not ruled upon the proposal within the Documentation of Changes;

**WHEREAS**, the proposed creation of the reservoirs is not supported as a land use under law and is against the mission and land use policies of the Forest Preserve District of Cook County; and

The new culvert will replace an existing 36-inch storm sewer at the same location, which severely restricts flow going into the pond. The installation will allow fuller utilization of the design capacity of the existing lagoon. As part of this project, the Village will stabilize the lagoon banks with 3:1 slopes, emergent plants and wet prairie plants, and restore the encroachment area with low profile grasses. A few low value trees impacted by this project will be replaced with new trees within the restoration area. The Village will manage the restoration area for 5 years to establish the new plantings.
