Summary: Camp Reinberg opened in June 2015 without approval by the Palatine Fire Department to occupy the four (4) unheated cabins without year-round fire sprinkler protection, even though they would be unoccupied during the winter. The cost to winterize the sprinkler system was significant, so the Forest Preserves requested a waiver to leave the cabins unprotected last winter and explore the feasibility of heating the cabins to allow for winter use. The cost to heat the cabins and meet the County and local codes proved to be unfeasible, and additional time is needed to revert to the original plans to winterize the sprinkler system only.

Summary: A contract extension is required to provide additional time to complete custom engraved stone elements for outdoor interpretive areas. Prior to the July contract end date, Forest Preserve staff sent notice of default to CCC for failing to complete work as specified, including the stone elements. The Forest Preserves did not wish to extend the contract while default was pending. As a result of discussions involving CCC's surety, CCC committed to a plan and timeline for completing stone element work under the contract. The contract period must be extended to allow for completion of work. Due to long fabrication times for some stone elements, installation may not occur until next spring.

In June, Forest Preserve staff sent notice of default to CCC for failing to complete work as specified, including the stone elements. As a result of discussions involving CCC’s surety, CCC committed to a plan and timeline for completing stone element work under the contract. The contract period must be extended to allow for completion of work. Due to long fabrication times for some stone elements, installation may not occur until next spring.
