The new agreement will save the Forest Preserves approximately \$163,180.00 annually. The term of the contract is for three-years.

As background, the Forest Preserves currently uses 241 AT&T phone lines that are of older technology using a voice-grade telephone service employing analog signal transmission over copper lines. This service was installed primarily at remote locations, such as maintenance yards, fueling stations, aquatic centers, and campgrounds, which are not connected to the County-wide telephone system.

The Easy Rate program will be combined with the County's existing Master Discount agreement (MDA) with AT&T to substantially reduce the cost per telephone line. With this new program, line rates will be reduced from an average of \$91.62 per month to \$35.20 per month after the MDA is applied.
