Established one hundred years ago, the Forest Preserves of Cook County is one of the oldest forest preserve systems in the nation, maintaining nearly 70,000 acres of open land for the education, pleasure and recreation of the public. We strive to protect and restore the county's diverse ecosystems, so all our unique native plants and animals can live and thrive. Each year, millions of people use these lands and facilities to enjoy or study nature, bicycle, hike, fish, cross-country ski, picnic, golf, canoe or simply relax in a large preserve that leaves urban life behind.
