			Summary: Audubon has been awarded a federal grant from NOAA to restore coastal wetlands and provide fish habitat at Powderhorn Lake and Marsh. The Forest Preserves has been sub-awarded \$807,290.00 to complete the design, permitting and construction of a water control and fish passage system. Restoration activities will include completion of an engineering design, regulatory approvals/permitting, and construction of a water control/fish passage system to restore natural water levels to Powderhorn Lake and Marsh. The grant sub-award requires the execution of a subrecipient agreement with Audubon. Final agreement is subject to legal review and approval.

			<p>Request for Proposals process and completed in September 2018 with funding support from the Illinois Department of Natural Resources' Coastal Management Program. In 2020, the Forest Preserves received additional grant funding to complete the design, permitting, bidding, and construction of the designed water control system.</p> <p>The Forest Preserves is requesting authority to contract the remaining final engineering design, permitting, bid package assistance, and construction administration assistance on a sole source basis to Hey & Associates, who is the original consultant that completed the initial pre-final design. The efficient and timely completion of the final engineering design is needed to acquire all necessary regulatory approvals/permits and prepare a bid package for construction within the timeline of the aforementioned grant. The contract for the construction of the water control system will be advertised and awarded using the standard construction contract bid process.</p>
