District(s): 6

Summary: The Forest Preserves has solicited a contract for hay farming at select sites which were historically used for agricultural purposes prior to acquisition by the Forest Preserves, and as such, do not exist in an ecologically natural state. Farmers will have use of the property for cutting and collection of hay. This practice allows the Forest Preserves to generate revenue, while at the same time preventing invasive plant species from overtaking fallow land. It is the Forest Preserve's intention to restore fallow land as capacity and funding allows, and these interim farming practices are a good method to keep lands in a more manageable condition until a restoration project can take place, thereby reducing future restoration costs. The contract term for hay cutting is a period of one (1) year, with four (4) one-year mutual renewal options to be exercised by the General Superintendent or their designee, which allows the Forest Preserves the option to discontinue farming practices at our discretion in order to restore these lands to a natural condition.

Mark Hansen was the sole bidder for the Jurgensen Woods and North Creek Meadow hay sites, for a total potential revenue generation over the next five (5) years of \$34,492.50.

Site	Acres	Revenue
Jurgensen Woods	61.1	\$10,692.50
North Creek	119	\$23,800.00
