Contract Number(s): #74000011236 issued under Project #22 RM 111

Concurrences:

The Chief Financial Officer has approved this item. Final contract is subject to legal review and approval.

District(s): 6

Summary: The Forest Preserves has solicited a contract for hay farming at select sites which were historically used for agricultural purposes prior to acquisition by the Forest Preserves, and as such, do not exist in an ecologically natural state. Farmers will have use of the property for cutting and collection of hay. This practice allows the Forest Preserves to generate revenue, while at the same time preventing invasive plant species from overtaking fallow land. It is the Forest Preserve's intention to restore fallow land as capacity and funding allows, and these interim farming practices are a good method to keep lands in a more manageable condition until a restoration project can take place, thereby reducing future restoration costs. The contract term for hay cutting is a period of one (1) year, with four (4) one-year mutual renewal options to be exercised by the General Superintendent or their designee, which allows the Forest Preserves the option to discontinue farming practices at our discretion in order to restore these lands to a natural condition.

Hendrix Farms was the sole bidder for the Tinley Creek Woods hay site, for a total potential revenue generation over the next five (5) years of \$23,500.80.
